Introduction and Program Description

The 21st CCLC is an extended day learning experience for youth that ensures students are on-track academically, demonstrate good character, and live a healthy lifestyle.

Our goals are to improve students' physical/emotional safety, academic achievement, on-time grade progression, proficiency in math and/or reading, sense of belonging, connection to school/caring adults/peers, and to engage their family members.

Enrollment will be open to all students, though recruitment will target economically disadvantaged students, as 72.75% are below proficiency in Math and 81% are below proficiency in English/Language Arts. Teachers and parents will refer students who are having difficulty in school (poor attendance, poor academic performance, or behavioral issues). The CCLC will be a stable, safe, and supportive environment that provides academic enrichment activities, skill development programs, and educational events to help an average of 80 students each day develop as learners and meet state academic standards.

The AASD Board of Education, the Principal of Highlands Elementary School, and the Director of the CCLC share student data with one another and the Wisconsin Department of Public Instruction to comply with federal and state reporting requirements. The principal communicates the data sharing requirements to the Board of Education, while schoolteachers and the CCLC Unit Director are responsible collecting and sharing the data with the principal during monthly team meetings. The principal will provide student data to the Boys & Girls Club staff and ensure that the public has access to the data via this program evaluation.

Typical Program Schedule

	MATH MONDAY	ARTS TUESDAY	WORD WEDNESDAY	STEM THURSDAY	FUN FRIDAY

Evaluation Findings

Progress Towards Objectives

Statewide Goal #1: Safe, Supportive Environment

Goal: Increase the percentage of students who rate the CLC as “Optimal” on the indicator of “Overall Safety”.

Statewide Goal #2: Challenge youth to develop as learners

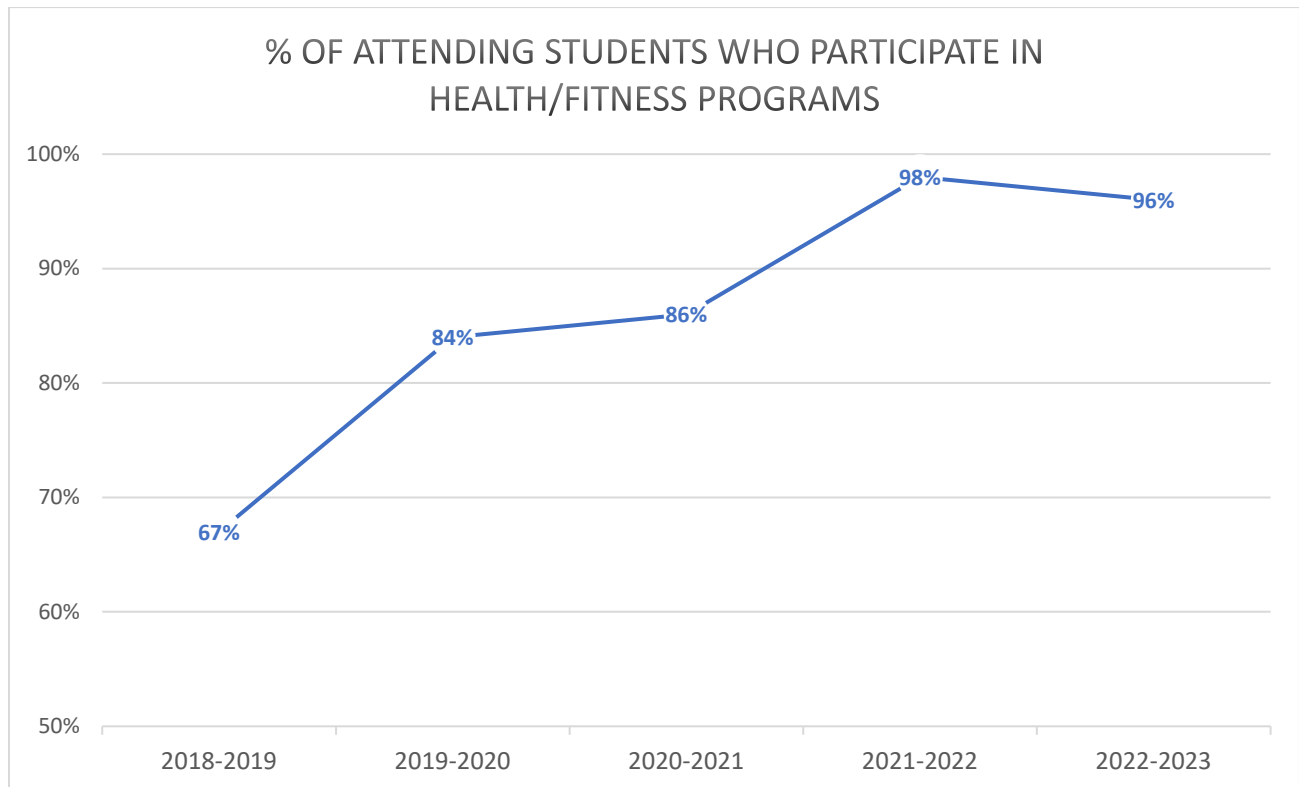

Goal: Improve student achievement in math and reading

(scores not available)% of regular attendees in grades 3 through 6 achieved an increase in scores on the Forward Exam in Math from 2022 to 2023.

(scores not available)% of regular attendees in grades 3 through 6 achieved an increase in scores on the Forward Exam in Reading from 2022 to 2023.

Statewide Goal #3: Support development of other skills for success

Goal: increase the percentage of students who participate in health/fitness programs

Statewide Goal #4: Engage families in support of student learning

Goal: Increase connection with adult family members of CCLC Participants

A goal for the 22-23 school year of 40% of families will connect with the program, the actual number was 45% which was reached by coordinating with the school and promoting activities and events the families are interested in attending, or meeting the needs of the families such as distributing meal packages before the Winter break from school.

Conclusions and Recommendations

The 21st CCLC at Highlands Elementary has seen great progresses towards student participation in programs targeted at other skills for success outside of academics. The 2022-2023 school year showed 98% of attending students participated in at least one health and/or fitness-based program.

The findings brought forward from statewide goal #4 shed light on some very key goals for the 2023-2024 school year. Engaging families in the program through special events will be a key improvement effort for the coming school year.
